

# Stack Overflow Developer Survey 2019

Asif Dawood 16 July 2024

# OUTLINE

- Executive Summary
- Introduction
- Metholology
- Results
  - Visualization Charts
  - Dashboard
- Discussion
  - Findings & Implications
- Conclusion
- Appendix

## **EXECUTIVE SUMMARY**

 Trends in Programming languages and Databases

Gender Gap

Demographics Survey

## INTRODUCTION

- Identifying the Programing languages and Databases expected to be popular and in demand for the future
- Can fill in the skill gaps
- Identifying top Programming languages in demand at present
- Identifying top Databases and Frameworks in demand
- Gender gap in Technology

## **METHODOLOGY**

- Collect data using the following technologies
  - Web Scrapping
  - Requests Library
  - API's

From GitHub Postings, Stack overflow survery

- Data Cleaning and wrangling
- Exploratory Data Analysis
- **Data Visualization**
- Reports

## **RESULTS**

### Snapshot of the Result Database

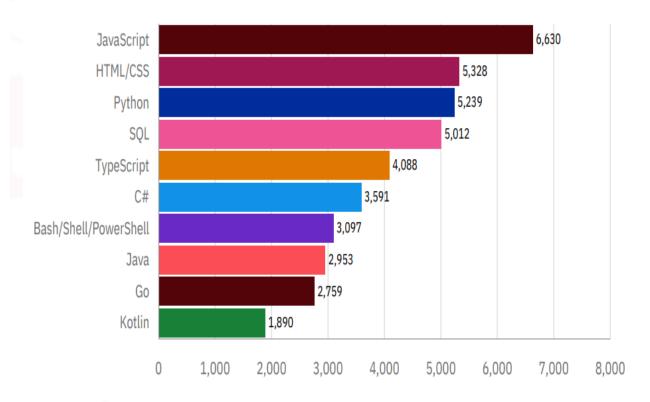

| Α          | В                     | С                      | D                    | Е                             | F                     | G         | Н                  | I                      | J                  |
|------------|-----------------------|------------------------|----------------------|-------------------------------|-----------------------|-----------|--------------------|------------------------|--------------------|
| Respondent | LanguageWorkedWith    | LanguageDesireNextYear | DatabaseWorkedWith   | <b>DatabaseDesireNextYear</b> | PlatformWorkedWith    | PlatformD | WebFrameWorkedWith | WebFrameDesireNextYear | DevEnviron         |
| 22         | Bash/Shell/PowerShell | Bash/Shell/PowerShell  | Elasticsearch        | Elasticsearch                 | Docker                | Docker    | Angular/Angular.js | Angular/Angular.js     | Sublime Text       |
| 22         | C++                   | C++                    | MySQL                | MySQL                         | Linux                 | Linux     | Ruby on Rails      | Ruby on Rails          | Visual Studio      |

## PROGRAMMING LANGUAGE TRENDS

### **Current Year**

#### JavaScript 8,687 HTML/CSS 7,830 7,106 SQL Bash/Shell/PowerShell 4,642 Python 4,542 Java 4,506 4,288 3,232 **TypeScript** PHP 2,913 C++ 1,946 5,000 8,000 10,000

### **Next Year**

Count of Languages (Count)

## PROGRAMMING LANGUAGE TRENDS - FINDINGS & **IMPLICATIONS**

## **Findings**

- Javascript and HTML are top choices
- Followed by SQL for data data driven decisions
- Python is also rising due to its versatility

## **Implications**

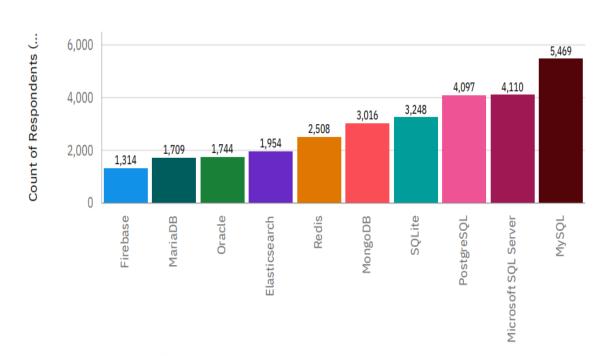

- Javascript and HTML still remains at the top implying Web development will be the way forward
- Python will also be in demand to its role in AI and ML
- Since data is everywhere, SQL retains is hold

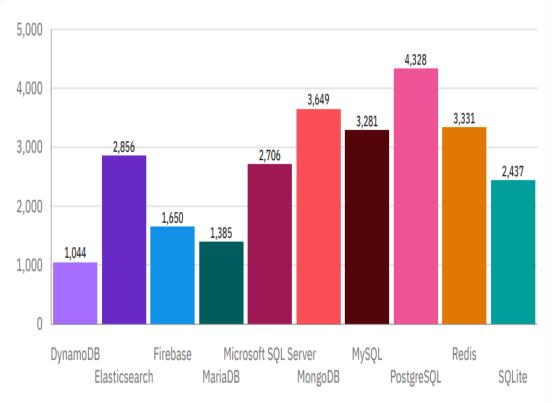

## DATABASE TRENDS

### **Current Year**

### Top 10 Databases

### **Next Year**

# DATABASE TRENDS - FINDINGS & **IMPLICATIONS**

## **Findings**

- MySQL is reigning at the top
- Followed by Miscrosoft SQL
- And Postgress SQL

## **Implications**

- Postgress becoming the favorite
- Since non structed, data is being analyzed Mongo DB has risen in popularity
- Redis is also rising due to its capability is analyzing NoSQL DBs

## **DASHBOARD**

Find the dashboard for this study here:

Project/blob/7244819e0baf39ff70ad2d40a5b5987425cca21b/Task5/IBM%20Data%20Analytics%20Cognos%20Project.pdf

## DASHBOARD TAB 1

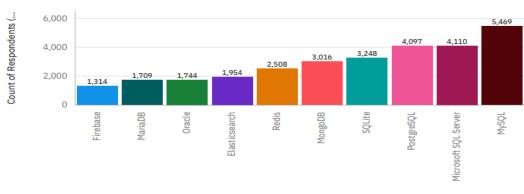

#### Current Technology Usage

Top 10 Languages

Count of Languages (Count)

#### Top 10 Databases

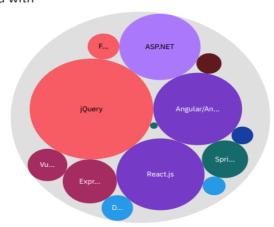

DatabaseWorkedWith

Platform worked iwith

Web Frames Worked with

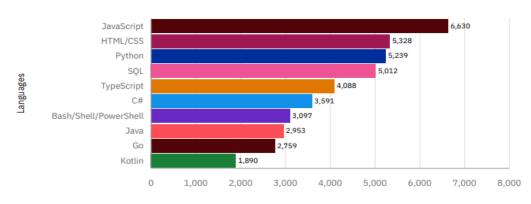

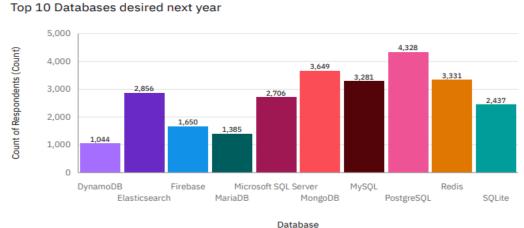

## DASHBOARD TAB 2

#### **Future Technology Trend**

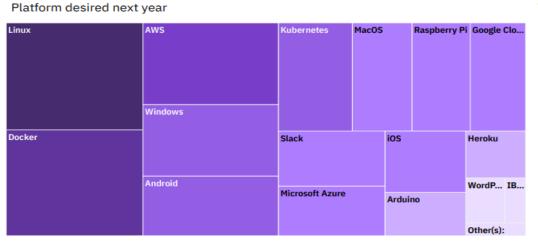

Top 10 languages desired next year

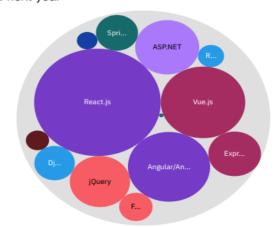

Count of Respondents (Count)

Web Frame desired next year

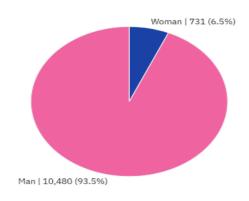

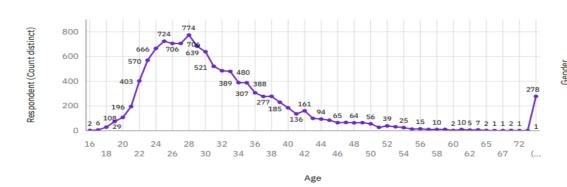

# DASHBOARD TAB 3

#### Demographics

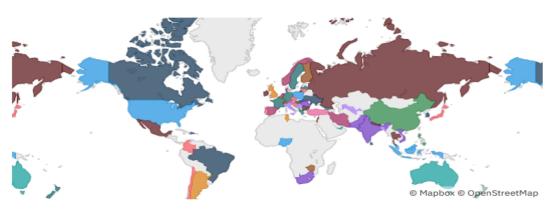

**Gender Distribution** 

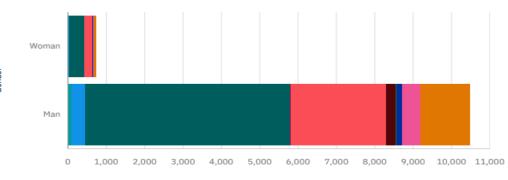

#### Count of Respondents by Age

#### Respondent by Country

Respondent by Gender colored by EdLevel

Count of Respondents (Count distinct)

## **DISCUSSION**

Training and filling of Skill-gaps

Trend in Technology

- Gender disparity in the field of technology
- Technology gaps between developed and developing regions

## OVERALL FINDINGS & IMPLICATIONS

## **Findings**

- Concentration of technology in select countries
- Gender gap only around 6% women in the field of technology
- Rise of No SQL databases

## **Implications**

- The Rise of NoSQL databases like MogoDB, Redis etc implies the data in any form is important and needs to be analysed for better data driven decisions
- The gender gap and gap in technologies between Regions to be bridged

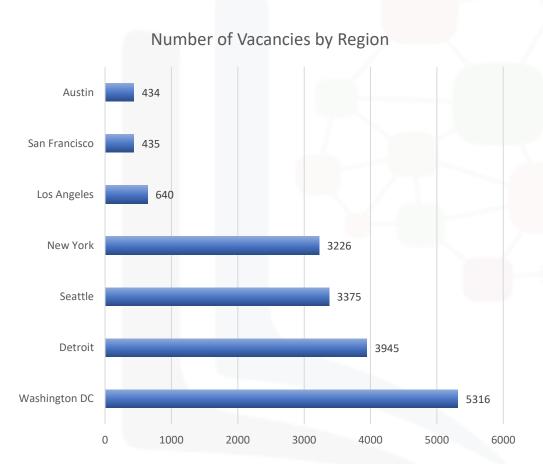

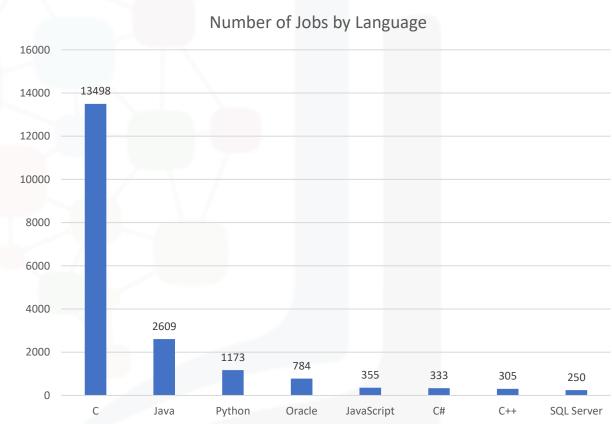

## CONCLUSION

- A good overview of the rising technology trends
- Identified the Gender gaps in technology
- Also Noticed that technology gap was prevalent between regions
- NoSQL is gaining ground indicates that non structured data is now increasingly utilized for analysing data

# JOB POSTINGS
